Professional Summary

Innovative Senior Developer with over 8 years of experience building robust backend systems and cross-platform mobile applications. Expert in Node.js, Python, and Go, with a deep focus on API optimization, microservices architecture, and cloud-native solutions using AWS. Proficient in leveraging AI-assisted development tools like Claude and Cursor to accelerate delivery and enhance code quality.

Core Technical Skills

- **Languages & Frameworks:** Node.js (Nest.js, Express), Go, Python (FastAPI, Pandas), TypeScript, React Native, React.js, Next.js, MERN Stack.
 - **Cloud & Infrastructure:** AWS (Lambda, Batch, Rekognition, SSM, Amazon MQ), Firebase, Redis, Kafka, RabbitMQ.
 - **AI-Assisted Development:** Claude, Copilot, Cursor.ai.
 - **Databases:** MongoDB, MySQL, SQL, PostgreSQL (Supabase), Oracle.
 - **Tools & DevOps:** Docker, Linux (Ubuntu), Git, Postman, Bash Scripting, Dynatrace, Android SDK.
-

Professional Experience

Materialplus (Srijan) | Senior Developer | Aug 2022 – Current

- Architected and optimized backend services for a prominent Big Data project, focusing on high-performance API and database query efficiency.
- Developed scalable microservices using Nest.js, TypeScript, and Go, utilizing Kafka and RabbitMQ for message orchestration.
- Utilized AI tools including Claude, Copilot, and Cursor.ai to streamline the creation of npm libraries and node microservices.
- Implemented real-time communication protocols using WebSockets and optimized data retrieval speeds through Redis caching.
- Leveraged Python (Pandas) to engineer complex data generators for large-scale tree structures and custom attributes.
- Built comprehensive monitoring dashboards and synthetic monitors using Dynatrace to proactively debug and ensure system reliability.

Creative Capsule | Senior Developer | Apr 2020 – Aug 2022

- Engineered backend solutions for the transportation sector using Node.js and Nest.js microservices.
- Integrated various AWS services including Batch, Lambda, and Rekognition to automate high-compute tasks and image analysis.
- Managed asynchronous messaging queues via RabbitMQ and Amazon MQ to ensure system decoupledness and reliability.
- Facilitated client interactions, performed technical demos, and mentored team members to resolve complex technical hurdles.

SJ Innovation | *Software Engineer* | Dec 2018 – Apr 2020

- Delivered full-stack applications using the MERN stack and integrated Firebase for real-time data and authentication.
- Led mobile development initiatives for both Android and iOS platforms using React Native.

Svastek | *Android Developer* | Apr 2018 – Dec 2018

- Designed and deployed live Android applications, including food delivery and event apps.
- Developed serverless backend logic using Node.js Firebase functions and REST APIs with PHP.

Designway | *Android Developer* | Aug 2017 – Nov 2017

- Collaborated on the design, development, and deployment of two live Android applications for a leading local newspaper.
- Gained foundational experience in mobile app lifecycles and Play Store deployment during a 3-month intensive internship.

Licenses & Certifications

- **JavaScript: Patterns** – LinkedIn (Issued Jan 2026)
- **Go Essentials: Concurrency, Connectivity, and High-Performance Apps** – LinkedIn (Issued Aug 2025)
- **Learning Go** – LinkedIn (Issued Aug 2025)
- **PyCon India** – Attended premier Python conference in Bangalore (2015).

Key Projects

- **Goan Stickers (Android):** Created WhatsApp sticker apps using official APIs.
URL: <https://play.google.com/store/apps/details?id=com.evolutiontech.goanstickers>
- **Digital Menu System:** Full-stack application for restaurant management with peer order sharing and bill splitting.
- **Catering Portfolio:** Website showcasing services for a local catering business.
URL: shreedamodarcatering.github.io/
- **Splitter Backend:** Developed a performant REST API backend in Go using the Fiber framework for a bill-splitting application, with MongoDB for data persistence, JWT-based authentication, and auto-generated Swagger documentation.
URL: github.com/vinilprabhu/splitter-backend

Education

- **BE in Computer Science:** Padre Conceicao College of Engineering, Goa (2013–2017).
